

GVD NVR Viewer Now Supports Android Device

Isn't it great to have more choices to experience the convenience of GVD NVR Viewer? Now besides Apple handheld device, you can use GVD NVR Viewer application on the most popular mobile client platform- Android System on phone and tablet.

With GVD NVR Viewer on Android handheld device, user can easily monitor live video & recorded video instantly by operating essential functions include "Server Selecting, Camera Selecting, Viewer Choosing, Recorded Video Playback, and PTZ Control Features."

GVD NVR Viewer helps you to have safer connection even when you're far away from your own stores, offices, factories or houses. Experience the magic of GVD NVR Viewer with the new releasing software R2.6.0 (official release at the end of this July)

Features Included:

- Support Connection to Multiple NVRs
- Monitor Multiple Live Video Streams
- Support High Resolution for All Android Device
- Adjustable Quality Setting for 3G or Wifi Connection
- Support up to 16 Preset Points on PTZ Cameras
- Support up to 4x5 Camera Layout
- Support Snapshot for Live Video
